As a Front-End Developer with more than 2 years of hands on experience, I specialize in building visually appealing, responsive, and user-friendly web applications. I have strong expertise in HTML, CSS, JavaScript, TypeScript, React.js, and Next.js, with experience in developing scalable front-end architectures, ensuring cross-browser compatibility, and implementing accessibility best practices to deliver high-quality user experiences.

Education:

Atish Dipankar University of Science and Technology

B.Sc. in Software Engineering (Sept 2022 – dec 2025) | CGPA 3.43 / 4.00

Experience:

Front End Developer — Softvence Delta (Full-Time, On-site)

Jun 2025 – Present | Dhaka, Bangladesh

- Developing and maintaining modern front-end applications using React.js, Next.js, and TypeScript.
- Development and maintenance of highly scalable and reusable front-end user interface systems with responsive and mobile-first layouts.
- Integration of RESTful APIs and real-time features for delivering smooth and interactive user experiences.
- Close collaboration with various teams for delivering high-quality and production-ready features.
- Enhancing front-end application performance, accessibility, application architecture, best practices, and structured version control.

Front End Developer — TechQul (Full-Time, Remote)

Jun 2024 – May 2025 | Dhaka, Bangladesh

- Development and maintenance of highly scalable front-end interfaces using React.js, Next.js and TypeScript.
- Development and maintenance of pixel-perfect and responsive web pages from UI/UX designs.
- Implementation of Redux for global state management and optimization of complex UI state flows.
- Implementation and optimization of React Query for server state management and background data synchronization.
- Optimization and enhancement of REST API usage for delivering better front-end application performance.

Technical Skill:

- Programming Languages: C, Python, JavaScript, TypeScript.
- Front-end Development: HTML, CSS, React.js, Redux, Next.js, Tailwind CSS, React Query, Socket.IO.
- Back-end Development & Database Management: Node.js, Express.js, MongoDB, PostgreSQL.
- Version Control & Collaboration: Git, GitHub.

Projects:

Ecommerce - Robyy (Team Project) · [Live Link](#) · [Source Code](#)

- Designed and developed a feature-rich, completely responsive e-commerce solution with contemporary web technologies like Next.js, and TypeScript.
- Implemented features such as product browsing, cart management, checkout, and user management with REST API optimization.

German ButcherBD (Team Project) · [Live Link](#) · [Source Code](#)

- Facilitated dynamic browsing of categories and products with responsive images, allowing users to easily browse different food items and deals.
- Developed user-friendly filtering and selection processes for different food types, including meat, fish, and snacks, improving user experience and the ordering process.
